

An amazing, 2.9 acre serene lake lot which we could not believe existed in Oklahoma. Feels like you have your own personal vacation spot in a state park with rolling hills, rock outcroppings, outstanding vista views, large mature trees, and unbelievable lake access. You won't believe this spot exists so close to the city.

This lot has expansive views of the lake, a wonderful western vista view, and views of the charming foot bridge and fishing dock.

The lot is directly on the water with over 200 feet of shoreline and includes a private peninsula perfect for fishing, watching the sunset, or launching your canoe.

This lot is easy to build on to get a great view of the lake & Oklahoma sunsets directly from your house and back patio.

Plenty of large Pecan and Oak trees provide natural shade and privacy. The view from the back of your house is very private as a second pond sits over over the top of the lake.

Other lake lots in this subdivision have some building challenges, but this lot is perfect for building your dream lake house.

The beautiful nature setting and the private layout of the lots (all lots are larger than 2 acres) provides many creative opportunities for your family and friends. We had plans to host family weddings out on the peninsula, provide a prime spot for high school senior and wedding photo shoots, and of course - a perfect location for family gatherings for years to come.

We are sad to be saying good-bye to the Lake of the Woods, but our family plans are taking us out of Oklahoma. Even though we did not build on this lot, we have spent many morning and evenings out at the lake enjoying the peacefulness of the area and taking in the beautiful Oklahoma views.
